

Mateo Hysa

Entry 8

Picking up from the last entry, we continued writing our lab reports and I created my title and abstract. The title that I chose was "The effect that distance learning has on a students ability to concentrate and learn the topics that they are studying." which I did not fully commit to as I could change it if necessary. In my abstract, I described how distance learning has become a major part of our lives as a result of the ongoing pandemic. The transition to distance learning has influenced our ability to learn and assess how much we have learned, and my lab report will focus on how distance learning influences students abilities to learn and remain motivated.
